NOTE.

THE collecting of books treating on special subjects has been prevalent for a long series of years. I doubt if any subject has given more pleasure to the collector, than that afforded the seeker after works on Angling, Fish, Fishing, Fish-Culture, Fisheries, and kindred subjects.

The numerous writers on the Art of Angling from the earliest times to the present, testify to its fascination and popularity. No other branch of out-door sport has ever called forth such efforts in its praise, such minute directions for its pursuit, nor in such quantity, as has been given to the "gentle art."

This collection, commenced in 1890, has grown steadily, till it now numbers over two thousand titles. No attempt has been made to collect the many editions of that famous pastoral, "The Complete Angler," by Walton and Cotton. Yet enough are included to represent their contribution to the literature of Angling. Some of the titles included here will be searched for in vain in other collections. This list has been made to have in a convenient form a check against duplication while searching for new titles.

Twenty-five copies only printed for private distribution.
